GRC, Customer Assurance & AI Enablement Specialist

PROFESSIONAL SUMMARY

GRC and Customer Assurance specialist who started in hands-on Security Operations - phishing investigation, email forensics, EDR/XDR alert review, incident response, and security ratings remediation - and now runs customer due diligence end to end at EQS Group. Owns security questionnaires, RFP/RFx responses, Trust Center (SafeBase) evidence workflows, and LoopIO response management, coordinating SMEs across Security, Legal, Privacy, Product, and Engineering to deliver accurate, evidence-backed answers. Serves as Revenue Operations AI Champion, building AI agents and automation that cut repetitive workload across the team.

CORE SKILLS

GRC & Customer Assurance: Customer due diligence, security questionnaires, RFP/RFI/RFQ/RFx, vendor risk assessment, third-party risk management (TPRM), supplier onboarding, Trust Center operations, evidence management, ISO 27001, SOC 2, NIST, GDPR, ISMS, data protection

Security Operations: Phishing investigation, email forensics, EDR/XDR, incident response, security ratings remediation, external attack surface management, SIEM, log analysis, OSINT, MITRE ATT&CK, threat hunting

AI & Automation: Autonomous AI agent development, agentic workflows, prompt and context engineering, Model Context Protocol (MCP), CLI-based AI tooling (Claude Code, Gemini CLI, Codex CLI), workflow and compliance automation

Tools & Platforms: LoopIO, SafeBase, Jira, BitSight, SecurityScorecard, UpGuard, Linux, AWS, Azure, Google Cloud Platform (GCP).

WORK EXPERIENCE

Revenue Operations Analyst - GRC, Trust & Compliance / Customer Assurance Oct 2024 - Present

EQS Group (international cloud software provider for compliance, investor relations, and corporate governance) | Kochi, Kerala

- Own the customer due diligence function: security questionnaires, vendor risk assessments, supplier onboarding forms, and RFP/RFI/RFQ responses covering security, compliance, privacy, product security, and data protection for customers and prospects worldwide.
- Act as single point of contact between commercial teams (Sales, Customer Success) and specialist teams (Security, Engineering, Product, Legal, Privacy, Compliance, Finance, HR), translating SME input into accurate, customer-ready, evidence-backed responses.
- Administer the company Trust Center (SafeBase): approve customer access requests, map questionnaire requests to available evidence, and run NDA-gated documentation workflows via DocuSign, including bypass handling where a separate NDA exists.
- Curate the LoopIO answer library - reusing validated content, routing unique questions to SMEs, and feeding approved answers back - to cut duplicate effort and keep responses consistent across every customer request.
- Complete and track submissions in customers' external vendor management and procurement portals, coordinating evidence, deadlines, and follow-ups through Jira, Salesforce, and shared mailbox triage.
- Drive AI adoption across Revenue Operations as the team's AI Champion: educate colleagues, design prompt workflows, identify automation candidates, and build AI agents that reduce repetitive team workload.

Associate Engineer - Information Security (SOC-aligned Security Operations) Jun 2021 - Oct 2024

EQS Group | Kochi, Kerala

- Investigated employee-reported emails using header analysis, sender infrastructure review, URL/attachment checks, and indicators of compromise (IOCs), identifying phishing, impersonation, and credential-harvesting campaigns targeting employees.

- Hardened detection logic by feeding recurring threat patterns, malicious infrastructure, and false-positive findings back into email security tooling, improving future detection and reducing analyst noise.
- Triageed EDR/XDR alerts to assess endpoint threats and determine response or escalation; supported live incident response and authored structured incident reports covering timelines, actions, remediation, and lessons learned.
- Owned external security ratings (BitSight, SecurityScorecard, UpGuard): investigated grade drops, created remediation tickets, assigned asset owners, drove fixes to closure, and validated score recovery.
- Supported customer audits and security questionnaires in parallel (~50% of role by 2024), grounding compliance answers in first-hand knowledge of how controls actually operate - the foundation for the move into customer assurance.

PROJECTS

- Purple Teaming Home Lab - built an Active Directory domain with domain-joined endpoints, firewall with IDS/IPS, event log forwarding, and EDR monitoring to practice attack emulation, detection engineering, and incident response.
- Autonomous AI Agents - built and deployed OpenClaw on Google Cloud Platform and developed ZeroClaw, applying agentic workflows, MCP, prompt engineering, and cloud hosting to real productivity automation.
- Questrix – An agent that pre-fills prospect and customer questionnaires by pulling from our Q&A knowledge base and gathering customer context from Internal ticketing system.

CERTIFICATIONS & TRAINING

- Certified in Cybersecurity (CC), ISC2 | Jul 2024 - Jul 2027
- CGEIT Training, ISACA Sacramento | Mar 2026
- Prompt Engineering: How to Talk to the AIs, LinkedIn Learning | Aug 2025
- Cyber Threat Hunting L1, Active Countermeasures | Feb 2024
- Intermediate MITRE ATT&CK, AttackIQ | Feb 2024
- Become a SOC Analyst - Level 1, Cybrary | Sep 2023
- Practical Web Application Security and Testing, TCM Security | Jul 2023
- CCNA Routing & Switching (200-125), Cisco Networking Academy | Nov 2019

EDUCATION

Bachelor of Science in Electronics

Jul 2014 - Jul 2017

School of Technology and Applied Sciences, Kochi, Kerala
